

**Project Status Report: CEE-2018CPST-002**

**Report Date: 10/1/2018**

**Team Members: Ammon Hymas, Roman Calderon Pacheco, Yejezkel Jimenez Dominguez, Brandon Roberts**

**Project Title: Erickson Anchorage of Roof-Top Equipment**

**1) Summary of technical/non-technical challenges encountered**

- Our client didn't make it to the meet-and-greet so our challenge is to get in touch with them and set up a time when our group can all meet together and video call or just call them on the phone and discuss the project.

**2) Team approaches & resolutions to overcome challenges**

- We must have good communication with one another, and meet together to email the client. We then must find a time to video call/telephone the client to get more information.

**3) Status of challenge resolutions & potential project impact**

- We already emailed our client and are waiting for a response. We have been good at meeting together during our meeting times. We could work on more communication throughout the week.

**4) Project status & summary**

- We have yet to begin working on the project or discuss it in detail. We have read the information made available to us on Learning Suite. We meet together and defined our lead measures for our WIGs.
