

Project Status Report: CEEEn-2018CPST-005

Report Date: 10/15/2018

Team Members: Abbey Wilson, Adam Foulk, Bryce Miller, Braiden Green

Project Title: Nepal

1) Summary of technical/non-technical challenges encountered

- Still having a difficult time developing the formal needs of the project.

2) Team approaches & resolutions to overcome challenges

- Proceed with research into possible materials for use in the project, and climate conditions/availability that may affect our material choices.

3) Status of challenge resolutions & potential project impact

- Project Manager, Analyst, and Liaison are still in process of researching three materials each, while Cultural Researcher is currently researching weather, topography, and current building methods.
- Liaison is keeping Bishnu up to date with progress so that as soon as he gets the opportunity, he can help direct us on what we currently have.

4) Project status & summary

- Some materials (sandbags with barbed wire, bamboo, and compacted earth) have been identified as potentials, and research is currently being done on climate conditions.
