

Project Status Report: CEEEn-2018CPST-0 14

Report Date: March 18, 2019

Team Members: Alec Van De Graaff (Team Focal), Robert Anderson, Caleb Joubert, Natalie Bagley King

Project Title: Santaquin Irrigation-Water Conservation Study

1) Summary of technical/non-technical challenges encountered

- Still working on compiling all the research and data together from each of us.
- Trying to meet with faculty advisor, Dr. Williams to verify all our data and how we are going to present our findings.

2) Team approaches & resolutions to overcome challenges

- Tracked down Dr. Williams to set a meeting with him for the capstone
- Created a google doc where each team member can contribute their work.

3) Status of challenge resolutions & potential project impact

- Talked with Dr. Williams and are planning a meeting for this week.
- Each team member is adding their research and findings to the google doc.

4) Project status & summary

- Still finishing up GIS model
- Working on write up for final product
- Brainstorming ideas for how best to present the findings.

Please enter # of hours spent on project this last week for each team member in the order listed above
